It is recommended that pre-certification is also obtained from the plan if procedures could be considered Experimental/Investigational or are potentially cosmetic in nature (such as, but not limited to: abdominoplasty, cervicoplasty, liposuction/lipectomy, mammoplasty, augmentation and reduction (includes removal of implant), morbid obesity procedures, septoplasty, etc.).

Pre-certification of these benefits ensures the requested service is medically necessary and appropriate. All items listed here may not be covered under your plan even if it is determined that the requested service is medically necessary. To determine whether a benefit is covered or excluded, please review the eligible medical benefits and/or exclusions sections of your Plan.
